UNITED STATES POSTAL SERVICE NON-DELIVERY OF MAIL

This notice is to advise the public of a mail disruption which occurred for correspondence mailed in late July 1996, directed to the Patent and Trademark Office (PTO) Zip Code 20231. As a result of a United States Postal Service (USPS) error, some mail directed to Zip Code 20231 was returned to the sender as "undeliverable." The USPS has now corrected the problem and mail directed to Zip Code 20231 is presently being delivered as usual. This disruption did not affect mail addressed to the Assistant Commissioner for Trademarks, 2900 Crystal Drive, Arlington, VA 22202-3513.

The PTO has been advised by the USPS that any mail returned as a result of this particular USPS error will be accepted by the USPS if resubmitted at a service window in the same envelope. No additional postage will be required. It is suggested that the USPS employee at the service window be consulted about crossing out any "undeliverable" notation on the envelope. Any problems associated with the resubmission should be immediately called to the attention of the USPS, particularly, Ms. Cynthia McMullen at (202) 636-1278/1279 or by way of the Internet at cmcmull2@email.usps.gov.

1. Papers Filed Pursuant To 37 CFR 1.8

Any correspondence mailed by first class mail with a certificate of mailing thereon in compliance with 37 CFR 1.8 which was returned to the sender as a result of this particular USPS error and which is either resubmitted to the USPS for delivery or delivered to the PTO by private courier will be stamped by the PTO with the actual date of receipt in the PTO. The correspondence will, however, be accorded the benefit of any certificate of mailing under 37 CFR 1.8.

2. Papers Filed Pursuant To 37 CFR 1.10

Any correspondence mailed by "Express Mail" with the "Express Mail" label number placed thereon in accordance with 37 CFR 1.10 which was returned to the sender as a result of this particular USPS error and which is either resubmitted to the USPS for delivery or delivered to the PTO by private courier will be stamped with the original date of deposit as "Express Mail" with the USPS or the next business day, if the date of deposit is a Saturday, Sunday, or Federal holiday within the District of Columbia. 37 CFR 1.6(a)(2). The correspondence must be received by the PTO in the original "Express Mail" envelope or be accompanied by either the original "Express Mail" label or a legible copy thereof.

3. Paper Not Filed Pursuant To 37 CFR 1.8 or 1.10

Section 21(a) of title 35, United States Code, provides that "[t]he Commissioner may by rule prescribe that any paper or fee required to be filed in the Patent and Trademark Office will be considered filed in the Office on the date on which it was deposited with the United States Postal Service . . . ."

Therefore, in order to minimize the impact of this particular USPS error, any correspondence deposited with the USPS which was returned as a result of the error and which was originally mailed by first class mail without a certificate of mailing under 37 CFR 1.8 or by "Express Mail" without the "Express Mail" label number placed on the correspondence will be stamped by the PTO with the original postmark date, rather than the date of receipt in the PTO, or the next business day, if the original postmark date is a Saturday, Sunday, or Federal holiday within the District of Columbia.

In order to take advantage of this temporary practice, any patent or trademark correspondence affected by this disruption must be promptly resubmitted to the PTO in a new envelope addressed to the

Assistant Commissioner for Patents
Box Postal Disruption
Washington, DC 20231

Such correspondence must be accompanied by the original mailing envelope or a copy thereof showing the original postmark date and by a certificate demonstrating the original mailing date. Applicant should retain a copy of the original mailing envelope in his or her file in case a question is later raised concerning the original date of mailing.

A suggested certificate is as follows:

The undersigned certifies that the attached correspondence was deposited as first class mail/"Express Mail" with the U.S. Postal Service with sufficient postage addressed to the PTO at Washington, DC 20231 on _____ and was returned as a result of a Postal Service error.

Accordingly, it is requested that the filing date of _____ be accorded the correspondence.

_____
(Date)

Papers which were returned to the sender and forwarded to the PTO prior to this notice or papers promptly returned to the PTO in the original envelope after this notice will be given the postmark date to the extent possible.

Any review of these matters would be by way of petition (no petition fee required) providing whatever arguments and evidence petitioner has that the application/correspondence is entitled to a different filing date.

Questions concerning this notice should be directed to John F. Gonzalez, Senior Legal Advisor, (703) 305-9285.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.
